# Guests	Suggested Dance Floor Size
0-100	12'x12'
100-150	15'x15'
150-200	18'x18'

About our Dance Floor- Our staff will install your dance floor rental for you and, we do also break it down after your event. A dance floor generally takes between 30 minutes to one hour from our team. If your event is being held outdoors in the grass, please let us know this ahead of time. We will provide a subfloor beneath the dance floor. (additional charges apply). This provides support to the floor and prevents it from coming apart during your party. Dance floors should be installed on relatively flat ground without major holes or divots. The subfloor does provide a considerable amount of leveling ability, but you may still see the floor follow the contour of the ground to some degree. This is actually a positive and necessary thing, because it ensures no large drop offs along the edges of the dance floor

that would pose a trip hazard to guests as they enter and exit the floor. Our dance floor has a medium tone finish, but is constructed of highly durable material, which makes it extremely versatile. You can safely use our floor outdoors without worrying about damage from dew or rain. Of course, the floor will be slippery when wet so you should plan to have something on hand to dry up any spilled drinks or wetness, so your guests do not fall during the event.
