#### Perimeter Lighting:

The most basic lighting, great if you're on a budget but just want to add a little glow.

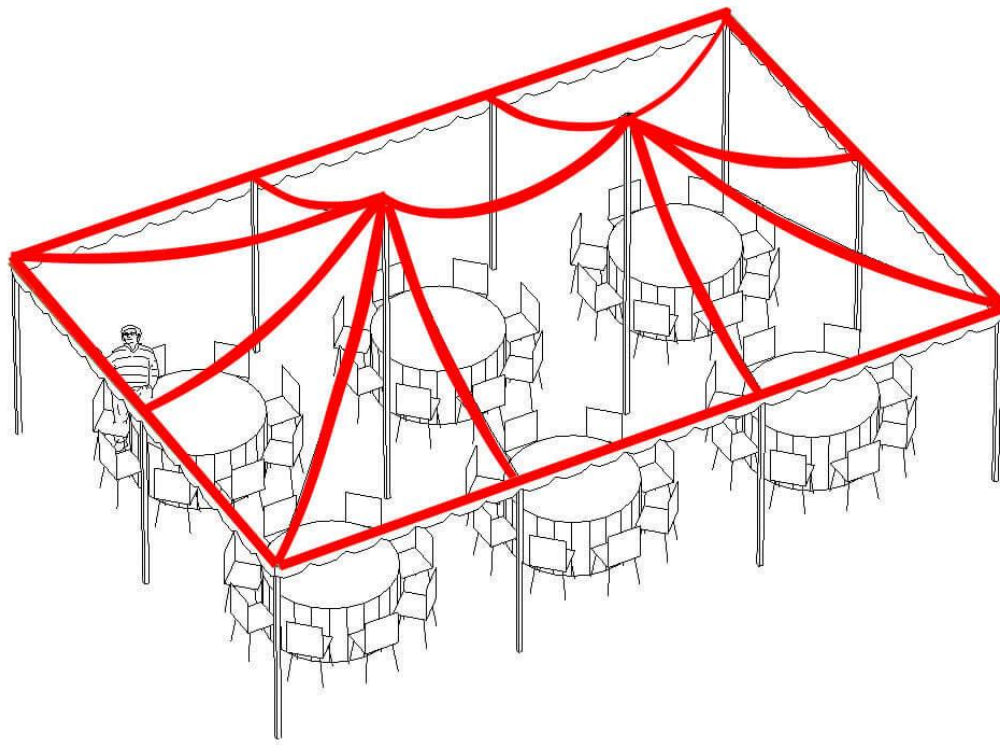

### Corner To Peak Lighting:

For the next step up there's our Corner to Peak layout. Lights span the perimeter and shoot up to the peaks only at the corners of the tent.

### Radial Lighting:

Similar to Corner to Peak layout the Radial layout focuses on fanning out the lights from the center poles. This layout provides a uniform glow throughout the tent.

### Deluxe Tent Lighting:

The Deluxe lighting layout is the most common lighting plan. Lights cover the perimeter and shoot up to the peak at almost equal distances around the tent.
